Locks

STORE DOOR CYLINDER MORTISE LOCK

Reversible

Size of Case, $5\frac{1}{4} \times 3\frac{3}{4}$ in.

Thickness of Case, 1 in.

Size of Front, $7\frac{3}{8} \times 1\frac{5}{16}$ in.

From face of Lock, to centre of Cylinder, $2\frac{7}{8}$ in.

Can be master-keyed with any of our Cylinder Locks.

Changes unlimited.

808 —Cast Bronze Face Cylinders, both sides.

808 $\frac{1}{2}$ — “ “ “ Cylinder, one side.

708 —Cast Brass Face, Cylinders, both sides.

708 $\frac{1}{2}$ — “ “ “ Cylinder, one side.

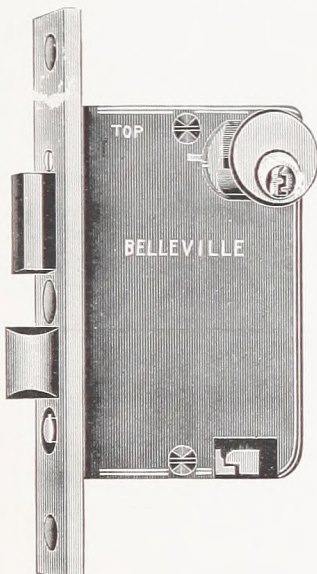

NOTE—**Car Latches** can be supplied on above Locks at extra cost, by prefixing “CL” to numbers. Car Latch Locks are not reversible.

For **Rabbetted** Locks add “R” to above numbers. Rabbetted Locks not reversible.

Specify hands of doors, when ordering.

STORE DOOR CYLINDER MORTISE LOCK WITH NIGHT LATCH ATTACHMENT

Reversible

To reverse take off cap and turn over bottom, thumb piece lifts, also latch bolt.

Can be master-keyed with any of our Cylinder Locks.

Size of Case, $5 \times 3\frac{1}{2}$ in.

Thickness of Case, 1 in.

Size of front, $7\frac{1}{2} \times 1\frac{1}{4}$ in.

From face of lock to centre of Cylinder, $2\frac{3}{4}$ in.

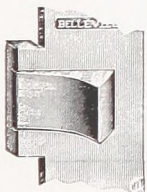

Changes unlimited.

832 —Cast Bronze Face, Cylinders both sides.

832 $\frac{1}{2}$ — “ “ “ Cylinder one side, Thumb Turn other side.

732 —Cast Brass Face, Cylinders both sides.

732 $\frac{1}{2}$ — “ “ “ Cylinder one side, Thumb Turn other side.

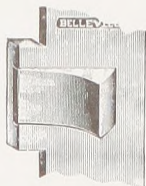

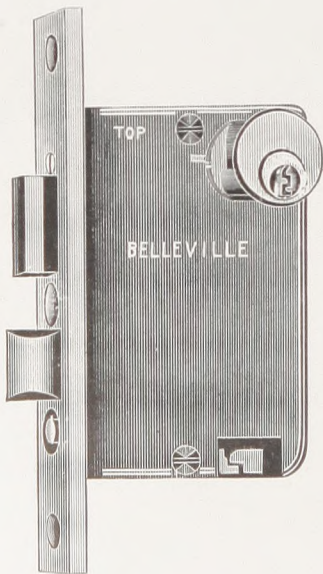

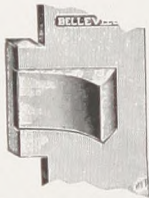

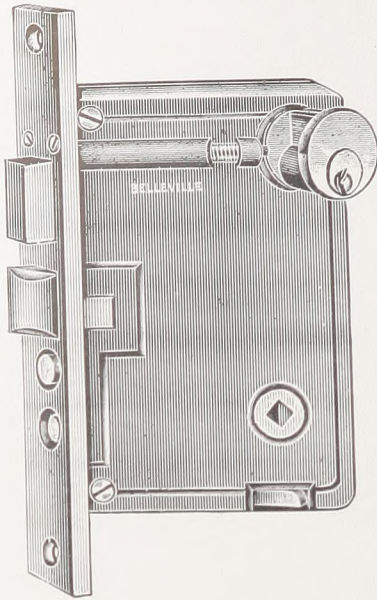

NOTE—**Car Latches** can be supplied on above Locks at extra cost, by prefixing “CL” to numbers. Car Latch Locks are not reversible.

For **Rabbetted** Locks add “R” to above numbers. Rabbetted Locks not reversible.

Specify hand of doors, when ordering.

SPECIFY FINISH REQUIRED

SECTIONAL FRONT DOOR CYLINDER LOCKS

Reversible

For Handles Outside and Knob Inside.

Size of Case, $3\frac{3}{4} \times 5\frac{3}{4} \times 1\frac{13}{16}$ in.

Size of Front, $7\frac{3}{4} \times 1\frac{1}{4}$.

Face to centre of Hub, $2\frac{3}{4}$.

Changes unlimited. Can be master-keyed with any of our Cylinder Locks.

Operation—Latch Bolt by Knob from inside and Thumb Lift Latch and Key outside. Dead bolt by Thumb Turn inside and Key outside.

8876—Cast Bronze Face, one cylinder.

7876—Cast Brass Face, one Cylinder.

NOTE—**Car Latches** can be supplied on above Locks by prefixing “CL” to numbers. Car Latch Locks are not reversible.

For **Rabbetted** Locks add “R” to above numbers.

Rabbetted Lock not reversible.

Specify hand of door, when ordering.

For Handles Both Sides Reversible

Size of Case, $5 \times 3\frac{1}{2} \times 1$ in.

Size of Front, $7\frac{1}{2} \times 1\frac{1}{4}$ in.

Face to Centre of Hub, $2\frac{3}{4}$ in.

Operation—Latch and Dead Bolt by Key outside Thumb turn inside. Latch by Thumb Lift from both sides when night work attachment is not on.

Changes unlimited. Can be master-keyed with any of our Cylinder Locks.

832 $\frac{1}{2}$ —Cast Bronze Face, Cylinder one side, Thumb Turn other side.

732 $\frac{1}{2}$ —Cast Brass Face, Cylinder one side, Thumb Turn other side.

NOTE—**Car Latches** can be supplied on above Locks at extra cost by prefixing “CL” to number. Car Latch Locks are not reversible. For **Rabbetted** Locks add “R” to above numbers.

Rabbetted Locks not reversible.

Specify hand of doors, when ordering.

SPECIFY FINISH REQUIRED

CYLINDER KNOB FRONT DOOR LOCK WITH NIGHT WORKS

REVERSIBLE

Size of Case, $5 \times 3\frac{5}{8} \times \frac{3}{4}$ in.

Size of Front, $7 \times 1\frac{1}{16}$ in.

From face of Lock to centre of Hub, $2\frac{3}{4}$ in.

Centre of Hub to Cylinder centre, $3\frac{5}{16}$ in.

Operation

Latch by Knob and Key outside, by Knob only inside, outside Knob held by stops in face. Dead Bolt by Key outside, by Thumb Turn inside.

Changes unlimited. Can be master-keyed with any of our Cylinder Locks.

8070—Cast Bronze Face, Cylinder one side.

7070—Cast Brass Face, Cylinder one side.

NOTE—Car Latches can be supplied on above Locks at extra cost by prefixing "CL" to numbers. Car Latch Locks are not reversible. For Rabbetted Locks add "R" to above numbers.

Rabbetted Locks not reversible.

CYLINDER KNOB LOCK, WITHOUT NIGHT WORK

REVERSIBLE

Size of Case, $5 \times 3\frac{5}{8} \times \frac{3}{4}$ in.

Size of Front, $7 \times 1\frac{1}{16}$ in.

From face of Lock to centre of Hub, $2\frac{3}{4}$ in.

Centre of Hub to Cylinder centre, $3\frac{5}{16}$ in.

Operation

Dead Bolt operated by Thumb Turn inside, by Key from outside.

Latch by Knob from both sides.

Changes unlimited. Can be master-keyed with any of our Cylinder Locks.

Cylinders One Side

8000—Cast Bronze Face, Cylinder one side.

7000—Cast Brass Face, Cylinder one side.

NOTE—Car Latches can be supplied on above Locks at extra cost by prefixing "CL" to numbers. Car Latch Locks are not reversible. For Rabbetted Locks add "R" to above numbers.

Rabbetted Locks not reversible.

Cylinders Both Sides

Size of Case, $5 \times 3\frac{5}{8} \times \frac{3}{4}$ in.

Size of Front, $7 \times 1\frac{1}{16}$ in.

From face of Lock to centre of Hub, $2\frac{3}{4}$ in.

Centre of Hub to Cylinder centre, $3\frac{5}{16}$ in.

Operation

Dead Bolt by Key from both sides.

Latch by Knobs from both sides.

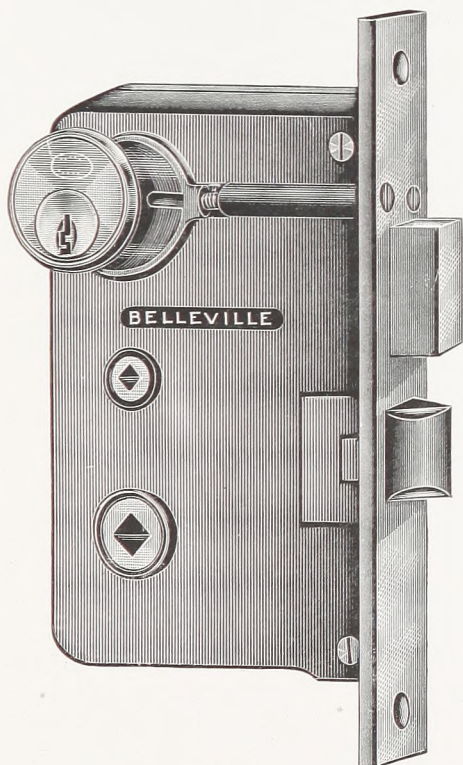

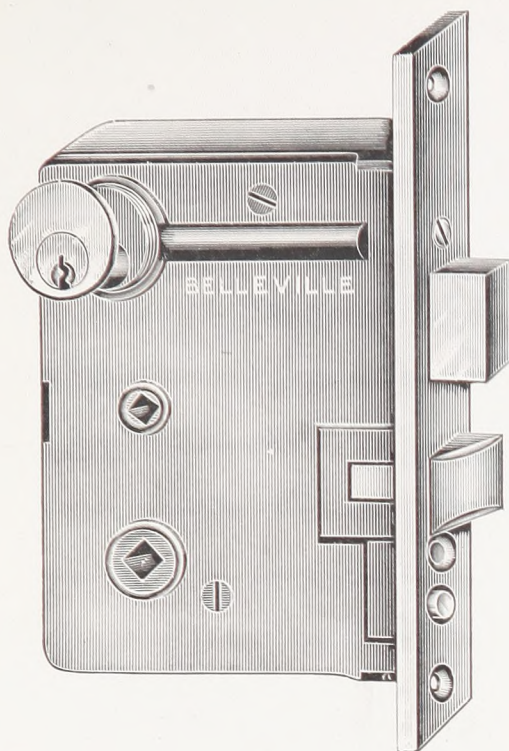

Changes unlimited. Can be master-keyed with any of our Cylinder Locks.

8002—Cast Bronze Face, Cylinders both sides.

7002—Cast Brass Face, Cylinders both sides.

For Rabbetted Locks add "R" to above numbers.

Rabbetted Locks not reversible.

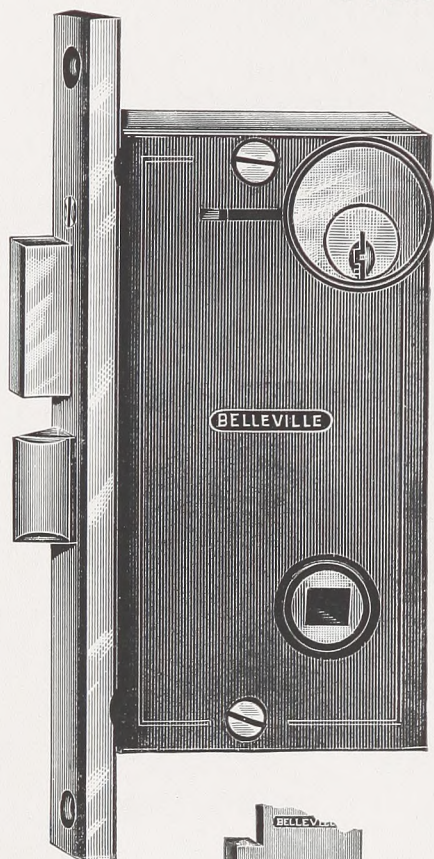

No. 8000

No. 8002

SPECIFY FINISH REQUIRED

CYLINDER OFFICE LOCK

Reversible

Size of Case, $5\frac{1}{8} \times 3\frac{1}{8}$ in.

Thickness of Case, 1 in.

Size of Front, $7\frac{1}{2} \times 1\frac{1}{4}$ in.

Face to centre of Hub, $2\frac{1}{4}$ in.

Changes unlimited, and can be master-keyed with any of our Cylinder Locks.

8250—Cast Bronze Front, one Cylinder.

7250—Cast Brass Front, one Cylinder.

8252—Cast Bronze Front, two Cylinders.

7252—Cast Brass Front, two Cylinders.

NOTE—**Car Latches** can be supplied on these Locks at extra cost by prefixing "**CL**" to above numbers. Car Latch Locks are not reversible.

For **Rabbetted** Locks add "**R**" to above numbers.

Operation

Latch Bolt by Knobs from both sides, Dead Bolt by Cylinder both sides, or Cylinder and Thumb Turn on one Cylinder Locks.

CYLINDER OFFICE LOCK

Not Reversible

Size of Case, $5\frac{1}{8} \times 4$ in.

Thickness of Case, $\frac{3}{4}$ in.

Size of Front, $7\frac{1}{2} \times 1\frac{1}{4}$ in.

Face to centre of Hub, $2\frac{7}{8}$ in.

Cast Brass Hub, $\frac{3}{8}$ in.

Changes unlimited. Can be master-keyed and grand master-keyed with any of our Cylinder Locks.

8150—Cast Bronze Front and Latch.

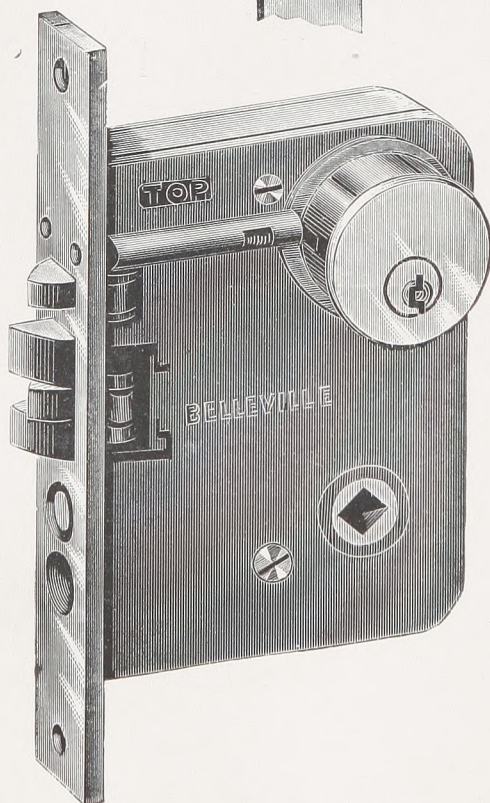

7150—Cast Brass Front and Latch.

Operation

Latch by Knobs from both sides. Outside Knob can be locked by night work attachment. By Key from outside at all times.

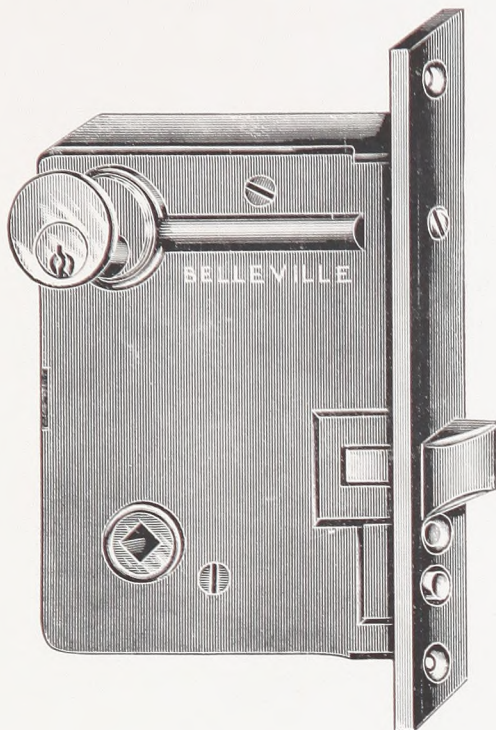

Auxiliary Latch dead locks main Latch when door is closed, making it impossible to push back the Latch with any thin instrument.

Specify hand of lock required.

SPECIFY FINISH REQUIRED

CYLINDER VESTIBULE OR OFFICE LATCH

Reversible

Size of Case, $4\frac{3}{4} \times 3\frac{1}{2} \times \frac{3}{4}$ in.

Size of Front, $6\frac{1}{2} \times 1\frac{1}{8}$ in.

Bronze Swivel Hubs.

Face of Lock to centre of Hub, $2\frac{3}{4}$ in.

Changes unlimited. Can be master-keyed with any of our Cylinder Locks.

8051—Cast Bronze Face and Latch.

Regular Key, No. 15.

Master Key No. M16.

852 $\frac{1}{2}$ —Cast Bronze Face.

752 $\frac{1}{2}$ —Cast Brass Face.

Extra Heavy Steel Key.
Can be master-keyed and grand master-keyed with any Lock taking same Master Key.

For **Rabbetted** Locks prefix "R" to above numbers and specify hand of door required.

SPECIFY FINISH REQUIRED

MORTISE HOTEL LOCKS

REVERSIBLE

Size of Case, $4\frac{3}{4} \times 3\frac{3}{8} \times \frac{3}{4}$ in.

Size of Face, $6\frac{1}{2} \times 1\frac{1}{16}$ in.

Backset, $2\frac{9}{16}$ in.

Regular Key, No. 15.

Master Key, No. M16.

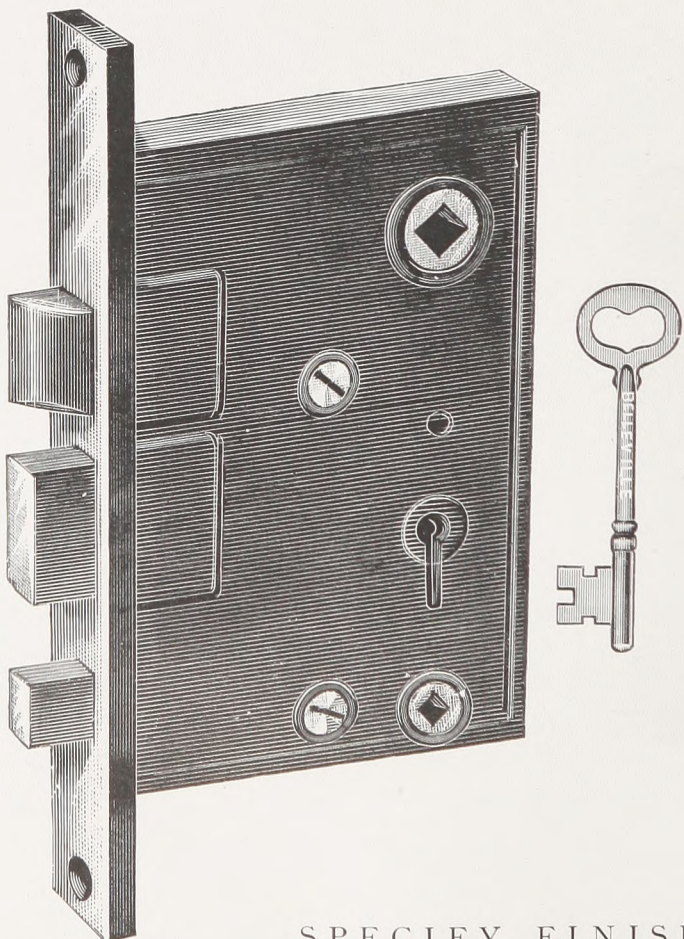

8950—Cast Bronze Face.

7950—Cast Brass Face.

Operation

Latch Knobs from both sides, Dead Bolt by Key from outside, and by Thumb Turn from inside. Can be master-keyed and grand master-keyed with any Locks taking same master key.

MORTISE HOTEL LOCK (Three Bolt)

REVERSIBLE

Size of Case, $4\frac{3}{4} \times 3\frac{3}{8} \times \frac{5}{8}$ in.

Backset, $2\frac{9}{16}$ in.

Size of Face, $6\frac{5}{16} \times 1\frac{1}{16}$ in.

Double coil spring action on Latch.

Regular Key, No. 7.

Master-key No. M10.

8125—Cast Bronze Face.

7125—Cast Brass Face.

Operation

Lower Dead Bolt by Thumb Turn on inside, Upper Bolt by Key from both sides, Latch by Knobs from both sides.

Can be Master-keyed with any Lock taking same master-key.

Size of Case, $4\frac{3}{4} \times 3\frac{3}{8}$ in.

Backset, $2\frac{9}{16}$ in.

Size of Face, $6\frac{5}{16} \times 1\frac{1}{16}$ in.

Single coil spring action on Latch.

Thickness of Case, $\frac{5}{8}$ in.

Regular Key No. 15.

Master Key No. M16.

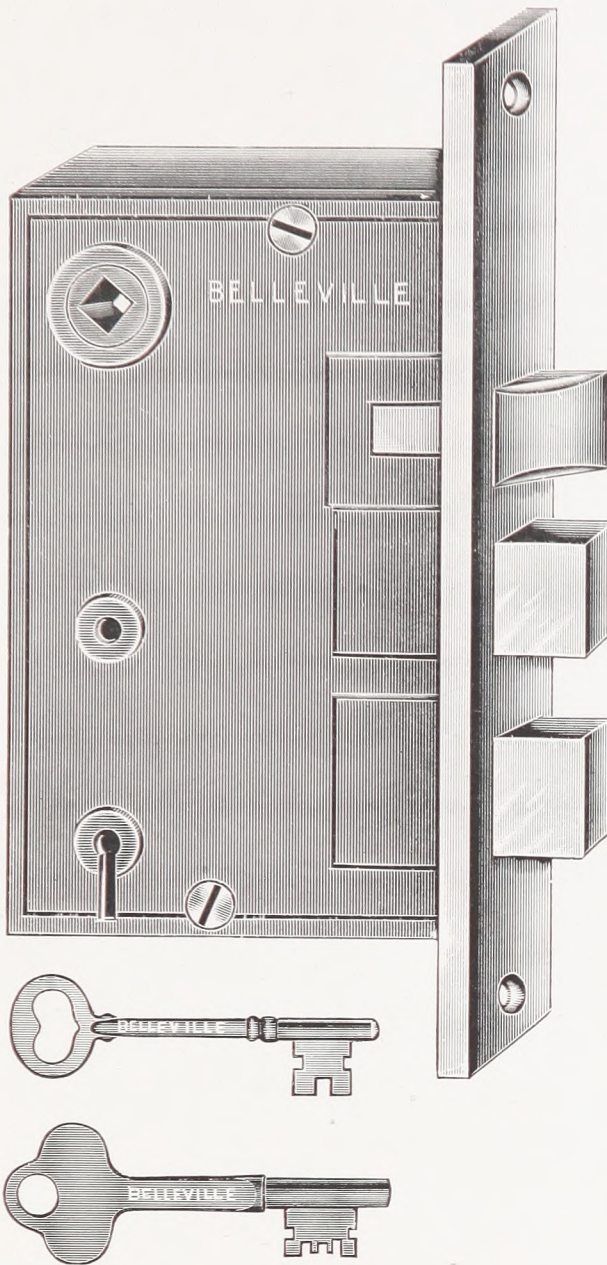

8125 $\frac{1}{2}$ —Cast Bronze Face.

7125 $\frac{1}{2}$ —Cast Brass Face.

Operation

Lower Dead Bolt by Thumb Turn on inside, Upper Dead Bolt by Key from both sides, Latch by Knobs from both sides. Can be master-keyed with any Lock taking same master-key.

SPECIFY FINISH REQUIRED

HEAVY MORTISE HOTEL LOCK**Not Reversible**

Size of Case, $5\frac{3}{8} \times 3\frac{1}{4}$ in.

Backset, $2\frac{9}{16}$ in.

Thickness of Case, $\frac{5}{8}$ in.

Size of Face, $7\frac{1}{8} \times 1\frac{1}{16}$ in.

Regular Key, No. 7.

Master-Key, No. M10.

8990—Cast Bronze Face.

7990—Cast Brass Face.

Operation

Latch Bolt by knobs, Dead Bolts by change and master-key from either side. When door is locked on inside it cannot be unlocked by key or picked from outside as the key holes for each bolt are distinct and do not go through the door. Master-keyed, one group of 300 Locks, all different, passed by one master-key or 300 Locks divided into sets as desired, the Locks in each set all different and of different change from the Locks in any other set, each set controlled by a master-key. Master-key nickel plated steel, change keys No. 7 N.P. Steel.

Not reversible.

Specify hand when ordering.

This Lock is also supplied with a Thumb Turn operation, instead of Guest Key on inside, and is **Reversible**.

Same dimensions as No. 8990.

8990 $\frac{1}{2}$ —Cast Bronze Front.

7990 $\frac{1}{2}$ —Cast Brass Front.

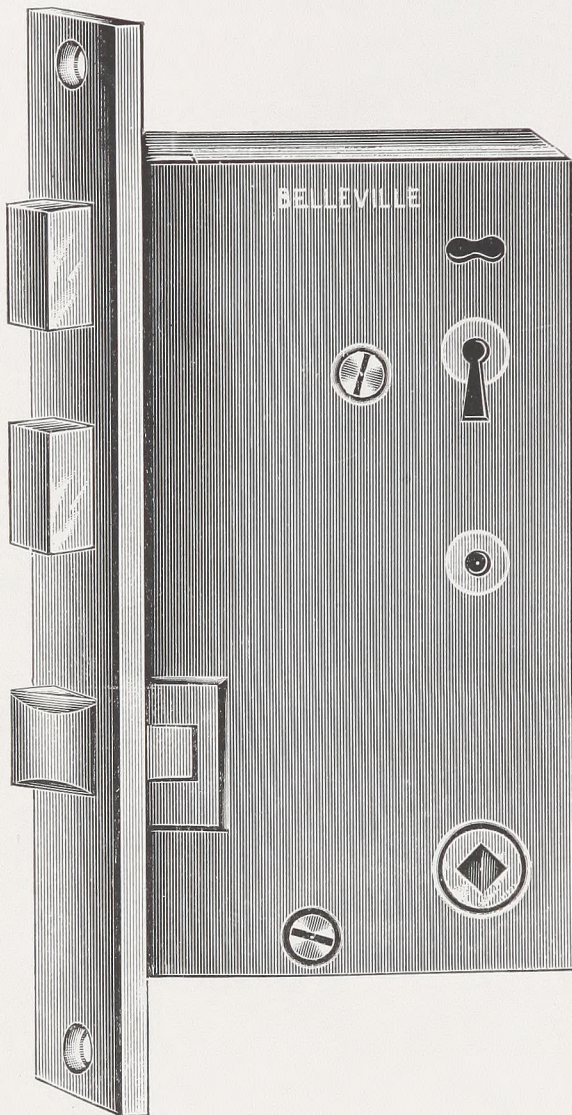

NOTE—Locks 8990 and 8990 $\frac{1}{2}$ can also be furnished with heavy Keys No. 15, if so desired, and can be grand master-keyed.

8048—Bronze.

7048—Brass.

Size, 6 x $3\frac{3}{8}$ in.

Set Back, $2\frac{1}{4}$ in.

Distance from Face to centre of
Key Hole, $2\frac{3}{4}$ in.

Size of Bronze Metal Front, 8 x
 $1\frac{1}{8}$ in.

Easy Spring, Easy Latch Bolt,
Firm on Knob.

Tumblers, 3 Wrought Steel Tum-
blers, 200 changes.

All packed with Screws.

Case thickness, $\frac{3}{4}$ in.

Case, 6 x $3\frac{1}{2}$ in.,

Brass Hub for $\frac{5}{16}$ in. Straight
Spindle.

3 Bolts, Heavy Bronze Metal.

Handed, not reversible, specify
hand.

Keys, Nickel Plated Steel.

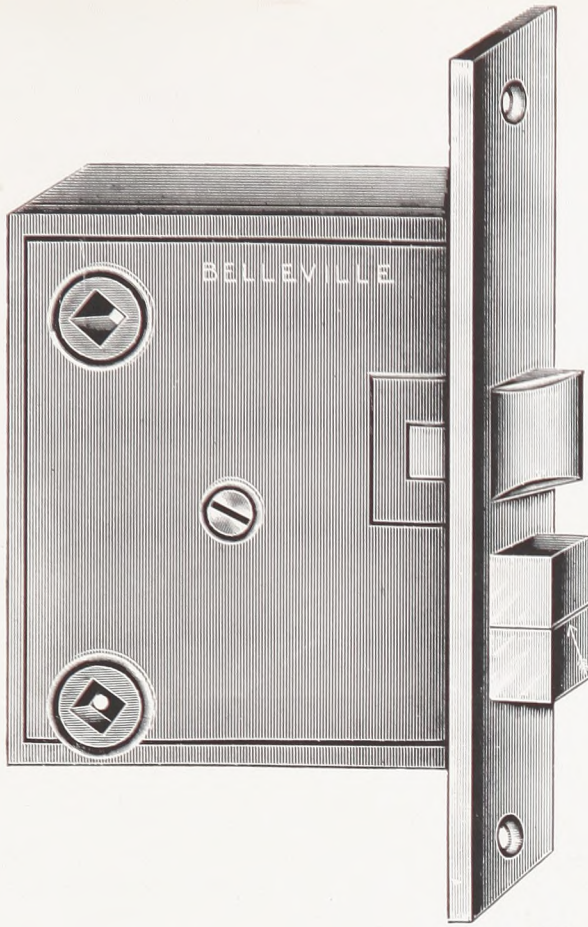

This Lock is so arranged that when the Bolt is thrown on the inside by the Key the Lock cannot be operated from the corridor by any Key; and while the door is locked on the inside, the Key cannot be taken out, thus always insuring the Key being in the Lock in case of fire or other immediate necessity for its use. The Key Holes are not opposite; the upper Key Hole is for the inside of door. Locking the door from the corridor will not prevent its being unlocked from the inside. Can be furnished in 1 Set of 2,400 Locks (or less), all different, with Master Key to pass. Can be furnished in Sets as desired, (every Lock different); with Master Key for each Set, and with a Grand Master Key to pass the whole 2,400 Locks, when desired. Can also be master-keyed in Sets with all other Locks having the same Key. Steel Master Keys for the above Locks.

This lock can also be supplied with Thumb Turn operation instead of Guest Key on inside, and is reversible.

8048 $\frac{1}{2}$ —Cast Bronze Face.

7048 $\frac{1}{2}$ —Cast Brass Face.

Opening, $1\frac{1}{8}$ in.
Face Plate, $1\frac{1}{2} \times 3\frac{7}{8}$ in.

48A—Bronze Finish, No. 49 Push Out Spring included.

SPECIFY FINISH REQUIRED

COMPLETE CAR AND SHIP LOCKS

In the following few pages are described the different styles of Car and Ship Locks, all as manufactured by this Company.

Each Lock is packed up **Complete** in a pasteboard box. Knobs, Key, Escutcheon and all necessary bronze screws (in a sealed envelope) are included. The box is carefully packed and labeled, and customers should remember that we include in our price a **complete** lock.

All parts of these locks are of cast bronze with phosphor bronze springs. They are of excellent workmanship, pleasing design and fine finish.

The box keeper is furnished with inboard Locks, for when the door is closed. It gives the Lock a symmetrical appearance and is not in the way at any time. A flat keeper can be supplied, but is seldom used. If a flat keeper on an Inboard Lock is desired, it must be especially noted in ordering. They are not carried in stock, but can be made up promptly. The flat keeper is furnished with Outboard Locks, for it acts as a protection to the door frame, as the knuckle of the Lock passes by it.

One Key is included in the price of each Lock. If more than one Key for each Lock is desired, we request that the number wanted be ordered before the Lock leaves our factory, as this makes sure that the extra Keys are properly fitted, and is preferable to copying the original Key.

The Keys are not interchangeable, fitting only the Lock for which they are made; but if desired, and ordered, we can furnish one style of key which will fit any number of Locks.

Pass or Master Keys can be furnished that will open any Lock, and are intended for use of those in charge of the rooms.

The following are the different styles of Locks:—

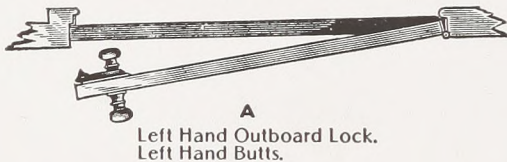

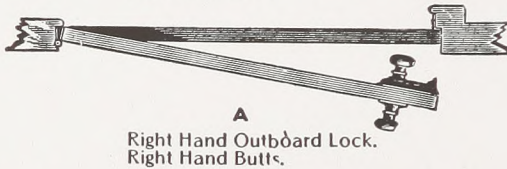

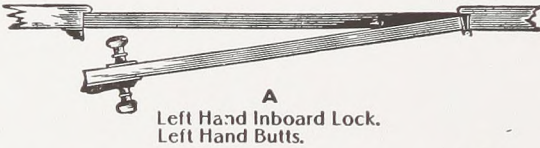

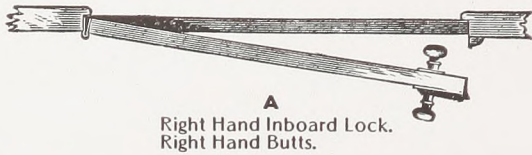

CABIN LOCK
HALL LOCK
PARLOR LOCK
STATE ROOM LOCK
TOILET ROOM LOCK
MORTISE LOCK

In the following pages are given illustrations and details of each of the different styles. The illustrations of Car and Ship Locks are approximately half-size. The special Knobs are all interchangeable with the round one, and can be substituted, when **ordered**.

To assist customers to order Locks, we offer the following Rules on next page for determining Rights from Lefts, and Inboard from Outboard.

SPECIFY FINISH REQUIRED

SUGGESTIONS FOR ORDERING LOCKS

1. Assume a position at "A" (facing the centre of the door) so that in opening the door it will always come towards you.

2. Standing in this position, if the Lock is to be on your right hand side, it is a right hand Lock. If it is to be on the left hand side, it is a left hand Lock.

3. Facing the Lock side of door, if in opening the door swings from you it is an outboard Lock, if towards you it is an Inboard Lock.

Right Hand Locks (either Inboard or Outboard) always take Right Hand Butts.

Left Hand Locks (either Inboard or Outboard) always take Left Hand Butts.

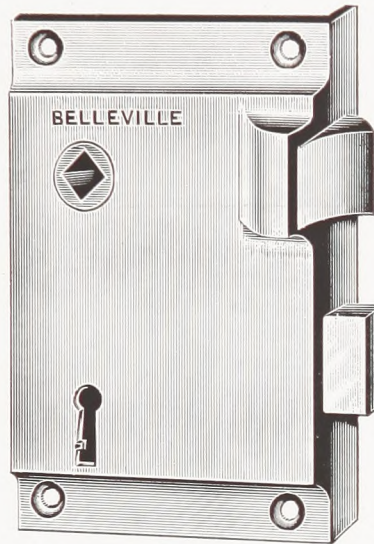

Inboard Locks are always on the side of the Pin of the Butt.

In ordering, always state thickness of the doors.

SPECIFY FINISH REQUIRED

THE "SHIP" CABIN LOCK

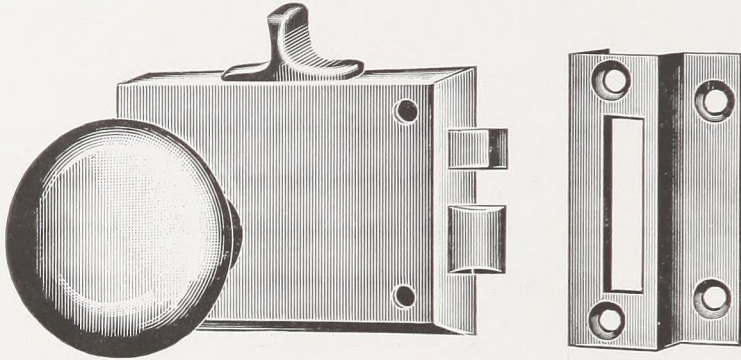

Finish, High Bronze

No.	Width (without keeper)	Height	Description
8043	5 in.	3½ in.	Right Hand Inboard, Box Keeper.
8044	5 in.	3½ in.	Left Hand Inboard, Box Keeper.
8045	5 in.	3½ in.	Right Hand Outboard, Flat Keeper.
8046	5 in.	3½ in.	Left Hand Outboard, Flat Keeper.

SPECIFY FINISH REQUIRED

THE "SHIP" TOILET ROOM LOCK

Finish, High Bronze

No.	Width (without keeper)	Length	Description
8041	2 $\frac{1}{4}$ in.	3 $\frac{1}{4}$ in.	Right Hand, Cast Bronze.
8042	2 $\frac{1}{4}$ in.	3 $\frac{1}{4}$ in.	Left Hand, Cast Bronze.

These prices are for a complete Lock, all necessary parts and screws to put in place.

Mortise Keepers are usually furnished, but special Keepers can be furnished without extra cost.

The Latch is reversible. The Latch is operated from either side by the handles. The Sliding Bolt is operated by the handle on the top of the Lock.

Plain Round Knobs are always furnished, unless otherwise ordered.

This Lock is suitable for Wash Rooms, Bath Rooms, Closets, etc.

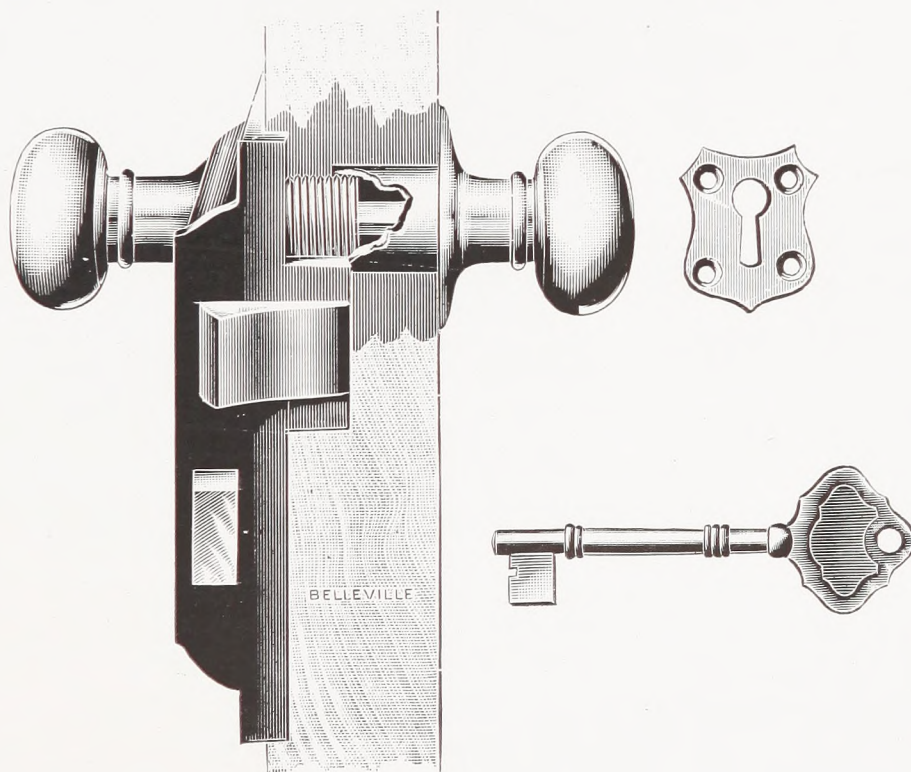

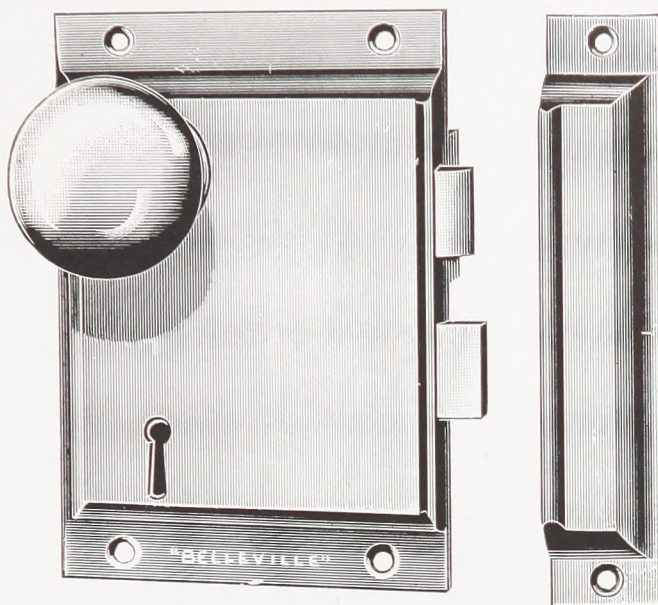

Special finishes to order.

SPECIFY FINISH REQUIRED

"SHIP" CABIN LOCK

Also Used as Car Lock

Cuts approximately one-half size.

SPECIFY FINISH REQUIRED

THE "SHIP" CABIN LOCK

Finish, High Bronze

No.	Width (without keeper)	Height	Description
8027	3¾ in.	5½ in.	Right Hand Inboard, Box Keeper, Cast Bronze.
8028	3¾ in.	5½ in.	Left Hand Inboard, Box Keeper, Cast Bronze.
8029	3¾ in.	5½ in.	Right Hand Outboard, Flat Keeper, Cast Bronze.
8030	3¾ in.	5½ in.	Left Hand Outboard, Flat Keeper, Cast Bronze.

These prices are for complete Locks, all necessary parts and screws to put in place.

Features

The loose knob screws through the door on to the body of the Lock, binding the two together. The Lock has a Knuckle Latch, which prevents rattling and also any injury to the Lock by slamming the door.

This Lock is designed to meet the requirements of hard service.

If a narrower Lock is desired see the "Ship" Hall Lock, page 43.

Plain Round Knobs furnished, unless otherwise ordered.

For detail description of Keepers, see page 38.

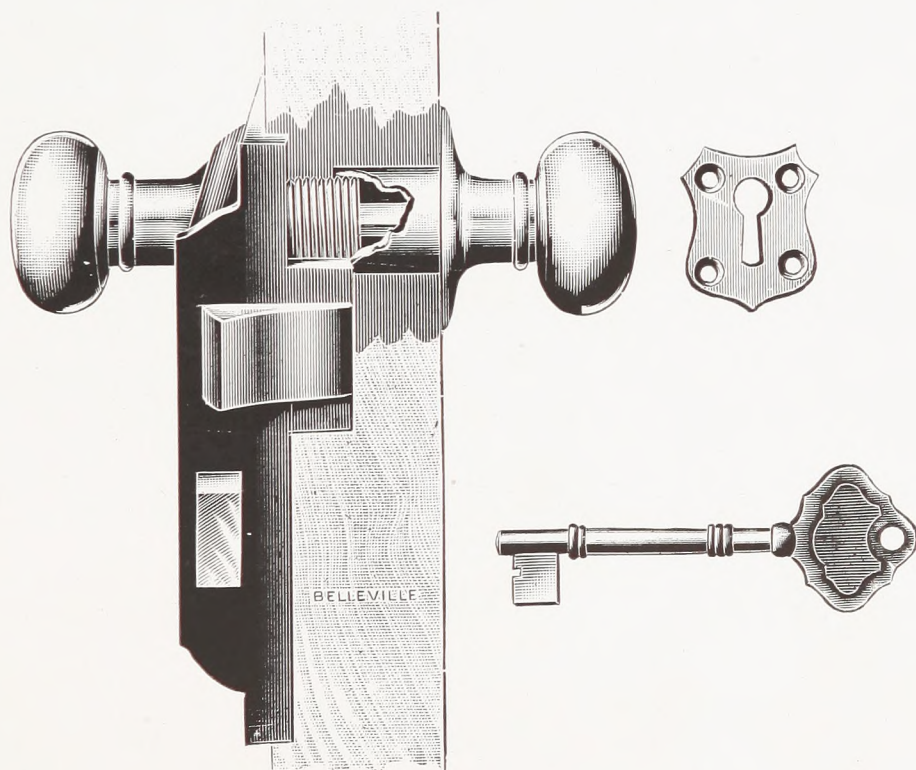

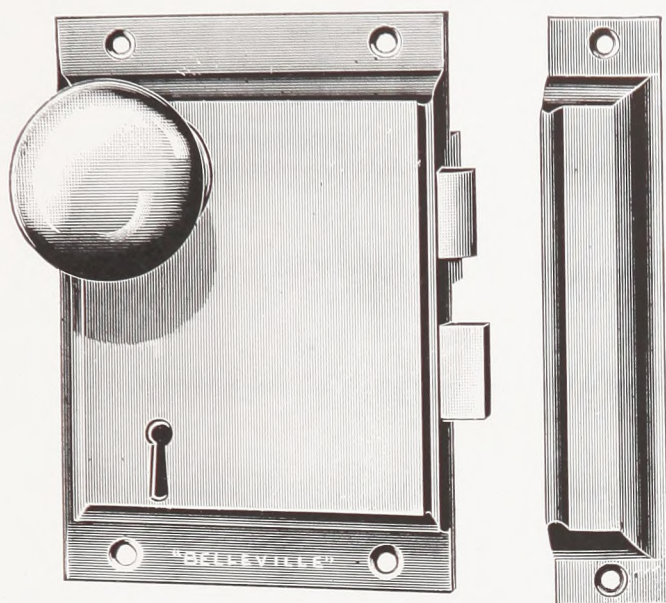

Special finishes to order. Prices quoted on application.

SPECIFY FINISH REQUIRED

"SHIP" HALL LOCK

Also Used as Car Lock

Cut approximately one-half size.

SPECIFY FINISH REQUIRED

THE "SHIP" HALL LOCK

Finish, High Bronze

No.	Width (without keeper)	Length	Description
8031	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Right Hand Inboard, Box Keeper, Cast Bronze.
8032	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Left Hand Inboard, Box Keeper, Cast Bronze.
8033	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Right Hand Outboard, Flat Keeper, Cast Bronze.
8034	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Left Hand Outboard, Flat Keeper, Cast Bronze.

These prices are for complete Locks, all necessary parts and screws to put in place.

Features

The loose Knob screws through the door on to the body of the Lock, binding the two together. The Lock has a knuckle Latch which prevents rattling, and also any injury to the Lock by slamming the door.

This Lock is designed to meet the requirements of hard service.

This Lock is, in all respects, similar to the "Ship" Cabin Lock (illustrated and described on pages 41 and 42, except being narrower.

Plain Round Knobs furnished, unless otherwise ordered.

For detail description of Keepers, see page 38.

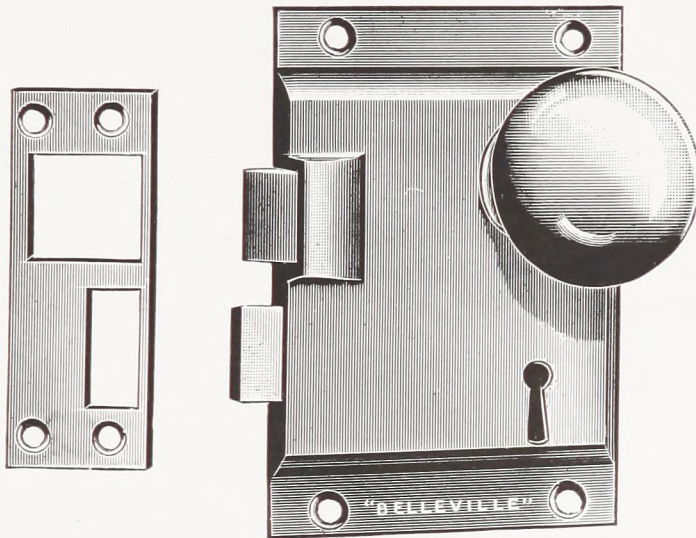

Special finishes to order. Prices quoted on application.

SPECIFY FINISH REQUIRED

"SHIP" PARLOR LOCK

Also Used as Car Lock

Cut approximately one-half size

SPECIFY FINISH REQUIRED

THE "SHIP" PARLOR LOCK

Finish, High Bronze

No.	Width (without keeper)	Height	Description
8035	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Right Hand Inboard, Box Keeper, Cast Bronze.
8036	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Left Hand Inboard, Box Keeper, Cast Bronze.
8037	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Right Hand Outboard, Flat Keeper, Cast Bronze.
8038	3 $\frac{3}{4}$ in.	5 $\frac{1}{2}$ in.	Left Hand Outboard, Flat Keeper, Cast Bronze.

These prices are for complete Locks, all necessary parts and screws to put in place.

Features

The loose Knob is attached to the door with screws, and is connected to the Lock by a spindle. The Lock has a Knuckle Latch, which prevents rattling and also any injury to the Lock by slamming the door.

Plain Knobs furnished unless otherwise ordered.

This Lock is designed to meet the requirements of hard service.

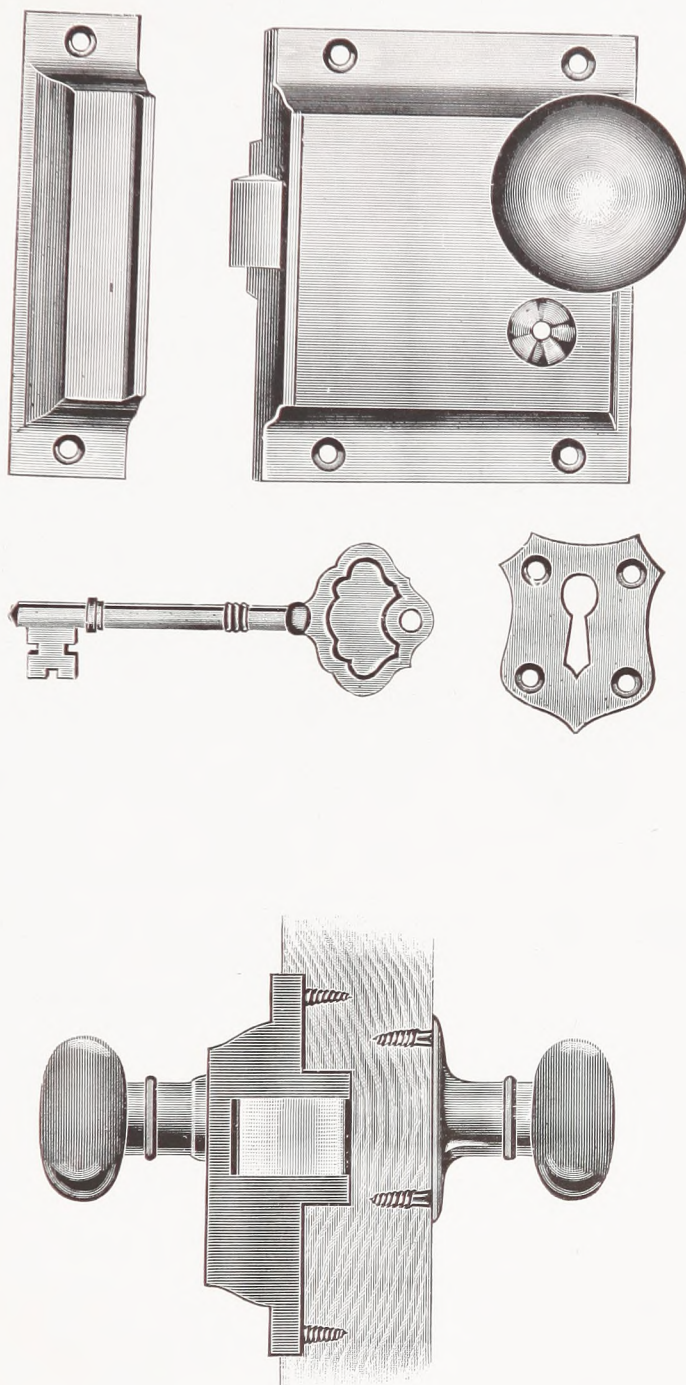

For detailed description of Keepers, see page 38.

Special finishes to order. Prices quoted on application.

SPECIFY FINISH REQUIRED

STATE ROOM LOCK

Cut approximately one-half size.

SPECIFY FINISH REQUIRED

THE "SHIP" STATE ROOM LOCK

Finish, High Bronze

No.	Width (without keeper)	Length	Description
8039	3¾ in.	4½ in.	Right Hand Inboard, Box Keeper, Cast Bronze.
8040	3¾ in.	4½ in.	Left Hand Inboard, Box Keeper, Cast Bronze.

These prices are for complete Locks, all necessary parts and screws to put in place.

Features

The Knuckle Latch is operated from the inside by the Knob and from the outside by the Key only. The outside Knob is fastened to the door by screws, and is entirely independent of the Lock, being used only as a handle for the door.

Not having a bolt and the outside Knob being stationary, the door is always locked when closed, and can only be opened from the outside by using the key, and from the inside the Latch is operated at all times by the Knob only.

On Steamboats where two persons are likely to occupy the same Stateroom, this style of Lock is desirable, as neither can Lock the other out, any one with a proper Key has access to the room. These Locks are only suitable for Inboard use.

Plain Round Knobs are always furnished, unless otherwise ordered.

For detail description of Keepers, see page 38.

Special finishes to order. Prices quoted on application.

Store Door Sets

SECTIONAL FRONT DOOR CYLINDER LOCK SET

Operation

Bronze Turn Knob to operate Dead Bolt from inside of door.

Both Bolts operated from outside with Key.

From Face of Lock to Centre of Hub 2—".

Centre of Hub to Cylinder Centre, $3\frac{5}{8}$ ".

Can be supplied with any number of changes and with Master Key, if required, at extra cost.

Description

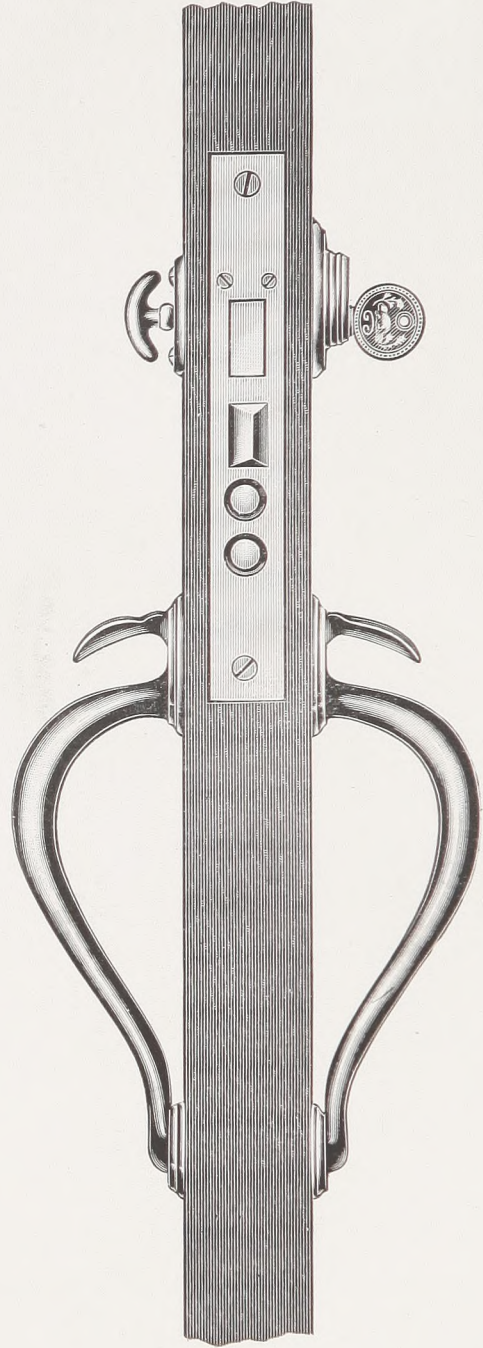

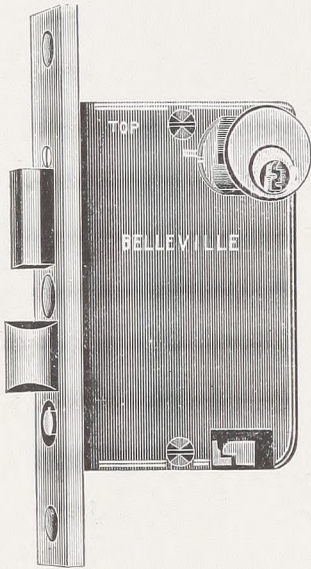

The accompanying cut represents the most up-to-date Sets on the market.

They are made in two styles, a screwless spindle knob and thumb turn on inside with a handle and cylinder on outside, or handles on both sides if required. They give the door a very neat appearance and can be made in any finish.

In ordering for rabbetted doors, state whether right or left hand is required and give thickness of doors.

KNOB SPINDLES

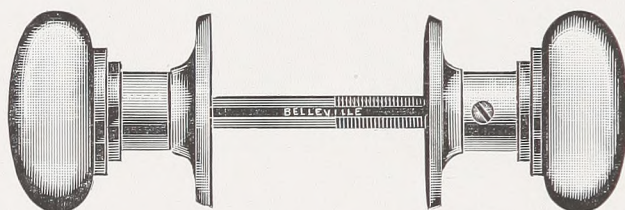

DIFFERENT STYLES OF SPINDLES

Type of Spindle No. 1

Regular, with Side Knob Screw

Stock sizes adjustable for Doors from $1\frac{1}{4}$ " to $2\frac{1}{4}$ " thick, other sizes supplied at extra cost.

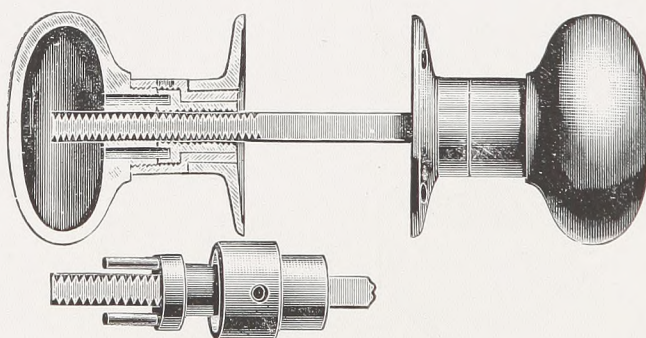

Type of Spindle No. 2

Simplex, with Set Screws

This type of Spindle will give much more accurate adjustment and is much more rigid than the regular Side Knob Screw Spindle type. The Knob is pinned to one end of the spindle and screws on the other end being held in place by a set screw.

Stock sizes adjustable for $1\frac{1}{4}$ " to $2\frac{1}{2}$ " doors.

Type of Spindle No. 3

Screwless, with Sleeve Adjustment

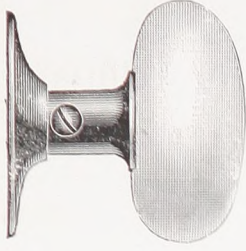

Spindles of this type do away with screws of any kind, and the Knob is held in place by special nut, which is tightened with sleeve. Very close adjustment can be secured with this style of Spindle.

Regular stock for Doors $1\frac{1}{4}$ " to $2\frac{1}{2}$ ".

CHICAGO "TRIPLEX" LAVATORY SPRING HINGES

2241

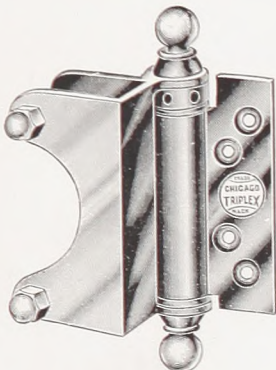

DOUBLE ACTING MORTISE BOX FLANGE HINGE

Wrought and Cast Bronze or Brass, highly polished or nickel plated; also cast nickeline metal.

2241—Double Acting, 4 in. flange; without door box.

2241A—Double acting, 4 in. flange; has box flange.

1 pair in a paper box, with bolts and screws.

2242

SINGLE ACTING MORTISE BOX FLANGE

Wrought or Cast Bronze or Brass, highly polished or nickel plates. Also Wrought or Cast Nickeline Metal.

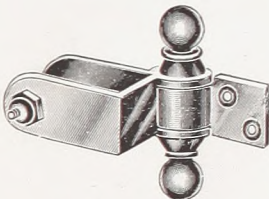

Single acting; reversible for right or left hand doors, opening in or out.

2242—Hinges only. 4 in. flange.

2242-2244—Hinges and blank. Blank has 1 1/8 in. flange.

2242-2246—Hinge and Checking Blank. Checking Blank has 2 in. flange.

1 pair in a paper box with bolts and screws.

2244

Nos. 2242, 2244, and 2246 are constructed for partitions 1, 1 1/4, 1 1/2, 1 3/4 or 2 inches thick. Wrought metal box flanges are adjustable 1/8 inch under and over to allow for variations in partition thickness.

The checking blank holds the door ajar when released, avoiding use of indicator.

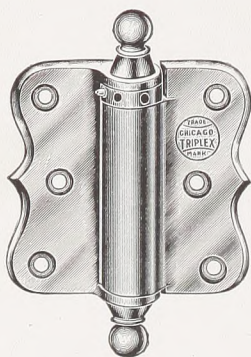

For narrow or medium weight doors use a hinge and blank.

May be furnished with reverse springs, to hold door open when released, to special order.

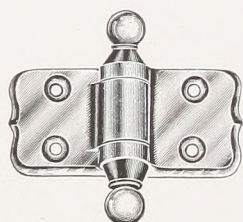

When ordering give list number, metal and finish. Also state if for wood or marble partition and give thickness of door and partition.

SPECIFY FINISH REQUIRED

2444

SURFACE LAVATORY HINGE

(Single Acting)

2442—4 in. Flanges.

2442-2444—Hinge and Blank.

2442-2446—Hinge and Checking Blank.

ADJUSTABLE BOX FLANGES

2242A—4 in. Flange.

2242A-2244A—With Springless Hinge.

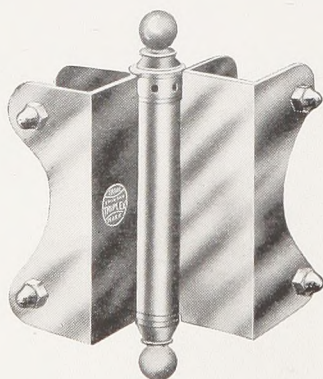

Can be furnished in cast metal without adjustable box flange.

Nos. 2242A and 2244A are constructed for partitions 1, 1¼, 1½, 1¾, 2 inch thick. The partition clamp box flange is "adjustable" ⅛ inch over and under these sizes to allow for variations in partition thickness.

For "Single Acting Lavatory Doors," narrow or of medium weight, a spring and springless hinge are sufficient.

NOTE—Always state if for wood or marble partitions, giving thickness of both door and partitions. Prices for other finishes on request. Single Acting Hinges may be furnished with reverse springs to throw the door open when released, but will be furnished so only when specified.

For dull or antique finishes, add 10%, and for nickel-ine metal, 20%, to list prices.

SPECIFY FINISH REQUIRED

PULLMAN SASH BALANCES

This Illustration shows the extreme simplicity of the Unit Sash Balance

Please note that all the moving parts are encased. There is nothing to rub on the woodwork and it is equally impossible to interfere with the action of the spring by squeezing the balance in a tight mortise.

The Pullman Unit is the only balance having this feature. And we might add that by far the larger part of any trouble ever caused by Sash Balances has been due to forcing into tight mortises, making the moving parts bind.

The Pullman Unit is the perfect balance. You can consistently specify Pullman Units, knowing that they will give your clients longer service and quieter and better working windows than the old fashioned cords and weights.

SPECIFY FINISH REQUIRED

SPECIFICATIONS OF UNIT SASH BALANCES

Side and Top Pattern Balances are the same price. Side Pattern is always sent unless Top Pattern is Specified.

Unit K, for 4 to 32 lb. Sash

Bal. No.	Weight of each Sash (Pounds)	Length of Tape (Inches)	Code Word	Per Set of 4 Bal. for 2 Sash
0-K	4 to 5	30	Kale	\$1.75

Depth of Unit M Balance $5\frac{1}{4}$ "

How to Order

Give weight of each Sash

Unit K takes uniform mortise for 4 to 32 lb. Sash.

Unit L takes uniform mortise for 10 to 48 lb. Sash.

Unit M takes uniform mortise for 24 to 105 lb. Sash.

Weight is usually marked on sash at the mill. Generally the upper and lower sash weigh the same. If not, give weight of each and we will send half sets of proper size.

Caution

Do not estimate the weight of sash, but weigh each one on scales. There is much variation in the weight of sash of the same dimensions. Be sure that sufficient space is left for the balances. See blue print. Where there is not room for the Side pattern Balances, use the Top pattern, shown in blue print as applied to narrow mullions.

Finish

The face plates of Unit Balances are regularly finished in dull black lacquer.

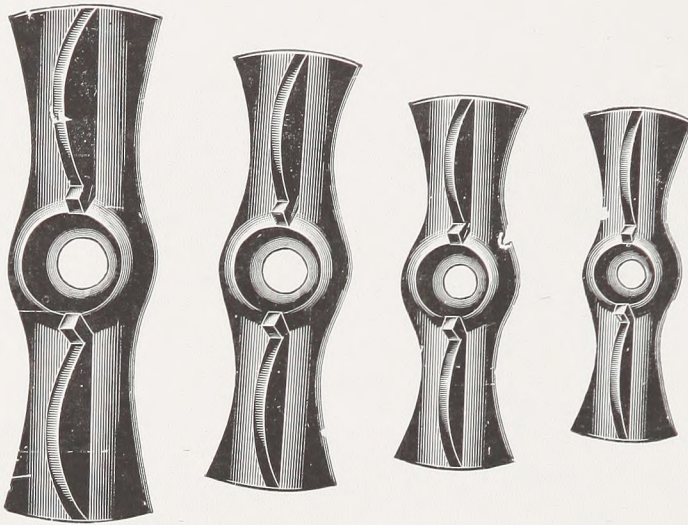

When required, Unit Balances are furnished with solid bronze or brass face plates in UNIT "K"; Unit "L" and in UNIT "M."

Electro-plated face plates—brass, bronze, nickel or copper, in UNIT "K," in UNIT "L," and in UNIT "M."

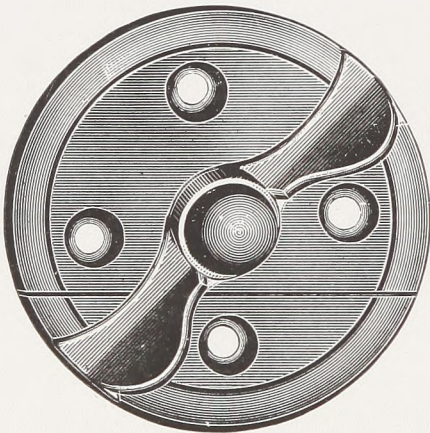

Tra Length Tape

We can furnish any of the "Unit" Balances with tape longer than listed above, but this does not add to the run of the Balances. It only permits the Balances to be placed so much higher up or further away from the sash. When it is desired to move the sash a greater distance than the listed tape, "X-Raise" Balances should be ordered, prices and description of which will be sent upon request. See page 7.

IRON CUPBOARD BUTTONS

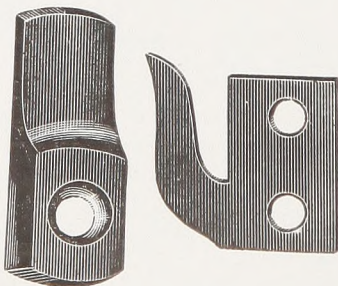

- 10— $1\frac{1}{2}$, Japanned Iron.
 $1\frac{3}{4}$, Japanned Iron.

JAPANNED BARN DOOR LATCHES

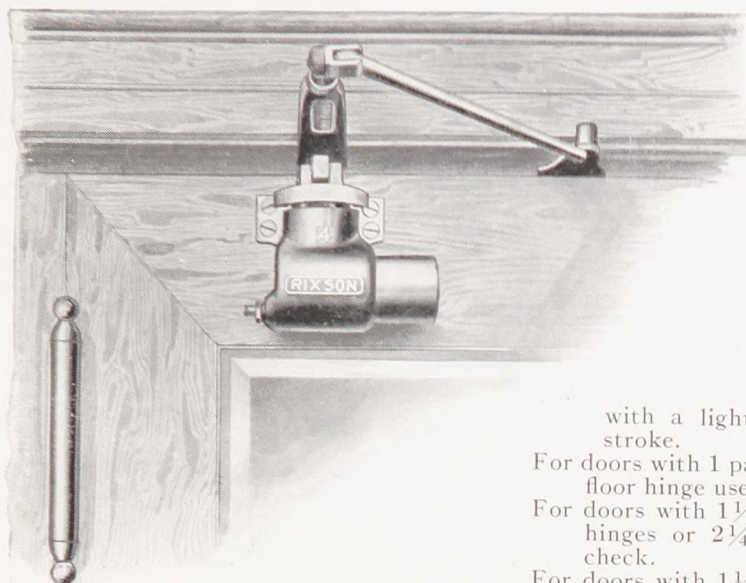

No. 5. Cut $\frac{1}{2}$ size.

No. 5—Heavy Cast Iron Japped Latch made of heavy Wrought Iron—Japped. Especially adapted for hard usage. Packed 3 Sets in a box.

THE RIXON

Double Acting Door Check—A Liquid Check

This Check is for use on any double-acting door equipped with spring hinges. There is no spring in the Check as it is a Check Only. It is attached to the door easily and quickly, no cutting of door is necessary and in fact no skill is required to apply it. The entire check arm included is attached on one side of the door. It may be fixed on either side. This Check is made in but one size, but in order to take care of doors of different sizes, and hinges of varying power it is made

with a light medium and heavy checking, stroke.

For doors with 1 pair of 6 or 7" jamb hinges, or 1 3/4" floor hinge use the light check.

For doors with 1 1/2 pair of 7" or 1 pair of 8" jamb hinges or 2 1/4" floor hinges use the medium check.

For doors with 1 1/2 pair of 8" or 1 pair of 10" or larger jamb hinges use the heavy check.

For Sand Blast finish add \$1.40 to List.

Solid Bronze or Brass Unpolished.....

Solid Bronze or Brass Polished.....

THE RIXON

Double Acting Checking Floor Hinge

The Rixon controls the door in its entire swing by means of a remarkable ingenious mechanism. The door is checked gradually and continuously right up to the centre or closed position. When the door is opened to 95 degrees the mechanism is automatically brought to "dead center" which holds the door open at this angle. A slight pressure releases the door and permits it to close. This feature is extremely useful to the housewife or maid, when preparing or clearing the dining table. The speed of the door may be instantly regulated from the surface of the floor by use of a screw driver on the checking valve. This is accomplished without removing the brass cover or displacing any part of the mechanism.

Description

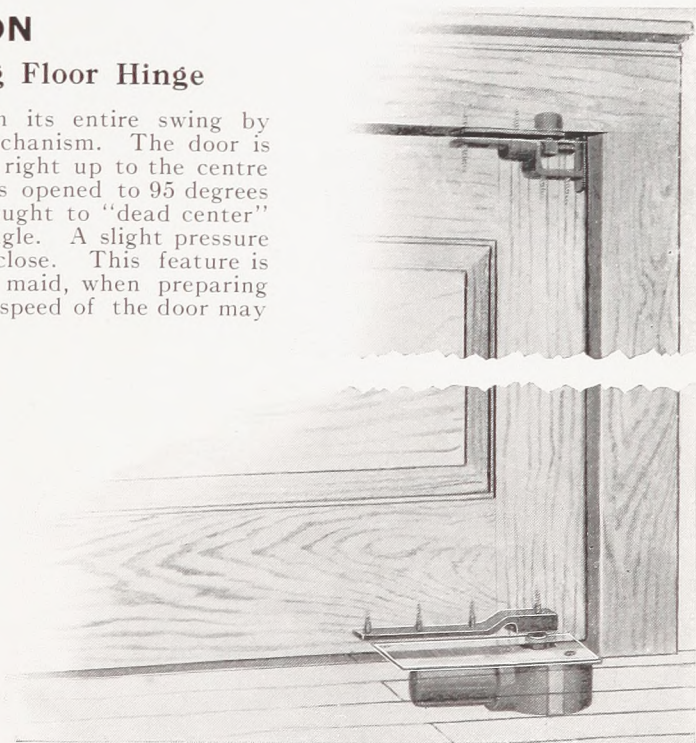

No. 10—For ordinary size Butler's Pantry door in residence.....

No. 15—For extra heavy Butler's Pantry door in residence.....

No. 30—For outside doors not over 3' x 7', 6".....

CHICAGO "AJAX" SPRING HINGES

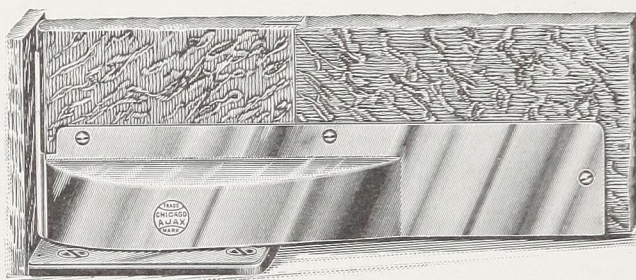

Ball-Bearing

Top Pivot and Socket

Exposed View

Applied View

Type No. 3000 Genie

The Chicago "Ajax" Spring Hinge (Type 3000) is unique and substantial in construction. It is a very durable, attractive hinge and has features of decided merit.

This hinge holds the door open when it is swung to ninety degrees. The weight of the door is carried on ball-bearings which are located at the top of the hinge away from moisture and dirt. The eccentric is equipped with hardened steel roller-bearings.

The compression spring is made of the best tempered steel wire and the tension is adjustable. The alignment feature is conveniently located and is both simple and practicable.

Where floors are tile or concrete, the hinges should be applied to the floor with expansion screws.

For Doors $1\frac{1}{8}$ to $1\frac{3}{4}$ inch

3001—Dead Black Japanned—Gap

3171—Antique Copper Plated—Garb.

3131—Bronze Plated—Gape

In ordering always state the FINISH NUMBER and SIZE.

CHICAGO "PREMIER" SPRING HINGES

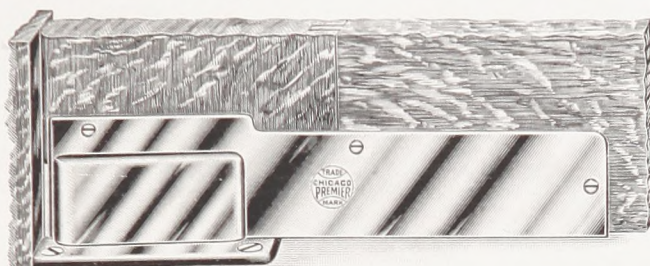

Ball-Bearing

Top Pivot and Socket

Exposed View

Applied View

Type No. 4000 Genius

The Chicago "Premier" Spring Hinge Type (4000) is of unequalled merit, in this type of hinge and is a high grade article in every respect.

This hinge holds the door open when it is swung to ninety degrees. The weight of the door is carried on ball-bearings, the eccentric is equipped with hardened steel roller-bearings and the piston is made of drop-forged steel.

The compression spring is made of the best tempered steel flat wire, producing the greatest efficiency and durability. The tension is adjustable.

The alignment feature is readily accessible at any time and is adjusted by turning a single screw. This eliminates any possibility of improper usage of this feature.

The attaching plate serves as a templet for cutting the door, requiring only the use of a saw and eliminates mortising projecting arms into the edges of the door.

Where floors are tile or concrete, the hinges should be specified with concrete floor-plates which are attached to the door casing. Concrete floor-plates are a part of the hinge and cannot be supplied individually for the regular hinges.

For Doors $1\frac{1}{8}$ to $1\frac{3}{4}$ and $1\frac{3}{4}$ to $2\frac{3}{4}$ inch
